Why Ikram?

- Full stack developer, adept at creating seamless user experiences by proficiently integrating frontend & backend technologies. Passionate & self-starter Individual, capable at crafting responsive & dynamic web applications using JavaScript frameworks like React while building powerful server-side functionalities with Node.js & PHP.
- Highly proficient backend engineer, expert at Git, GitHub & GitLab, creating & consuming RESTful APIs & GraphQL and kind of security protocols, authentication & authorization. Diligent professional, skilled at managing SQL & NoSQL databases while ensuring optimal performance & data integrity and effective at designing & implementing RESTful APIs.
- Dedicated website developer, specialize at designing & evolving visually appealing & responsive websites with precision, highly trained at HTML5, CSS3 & JavaScript while delivering engaging user interfaces and detail oriented, dynamic at working with CMS platforms like word press while confirming customized & scalable solutions.

CORE STRENGTHS & ENABLING SKILLS

- Programming Languages & Backend Development
- Micro Services Architecture
- PHP & Laravel
- Commerce tools & Story Blok
- Ecomz, Shopify & GitHub
- Laravel Forge & Send Grid

- Cloud Platforms
- Frontend Technologies
- Authentication & Security
- HTML/CSS & JavaScript
- APIs & Web Services
- Deployment & CI/CD

- Communication & Presentation Skills
- Organizational & Interpersonal Skills
- Collaboration & Team work
- Go Daddy, Cloud-flare & Make
- Object Oriented Programming
- Node.js, Express

PROFESSIONAL EXPERIENCE

Fine Hygienic Holding, Dubai, UAE
Working as "**Full Stack Developer**" (August 2022 - Present)
Responsibilities/ Accomplishments:

- ✓ Successfully expanding back-end services & infrastructure to support high traffic & large-scale operations while ensuring reliability & performance, planning APIs & evolving micro-services which enhancing system interoperability & functionality across various platforms and optimizing web applications to maximize speed, scalability & overall user experience confirming smooth operation under high loads
- ✓ Playing key role in establishing various parts of FHH direct-to-consumer ecosystem while contributing to overall success of platform, building & scaling back-end services to handle high traffic and improving system working & interoperability by designing robust APIs & integrating various systems leading to more cohesive & efficient platform
- ✓ Consistently managing project priorities & deadlines, delivering high-quality projects on time & meeting stakeholder expectations, achieving high-level system uptime guaranteeing continuous availability & stability of services which was critical for business operations and demonstrating strong teamwork & communication skills & collaborating with cross-functional teams to achieve project goals

UAE Technologies, Dubai, UAE
Worked as *"Backend Developer"* (March 2022 – July 2022)
Responsibilities/ Accomplishments:

- ✓ Adeptly generated REST APIs to facilitate seamless communication between front-end & back-end systems while ensuring efficient data exchange, implemented JWT token-based authentication & authorization mechanisms to secure back-end systems & protect user data and added new features to production projects, continuously improving functionality & enhancing overall user experience
- ✓ Efficiently built HRF home project an online platform dedicated to showcasing & selling homemade arts while backing to platform's usability & market reach, contributed significantly to SMN food project, comprehensive food ordering system by developing & optimizing backend services to supported smooth user experience and improved security of back-end systems
- ✓ Adeptly streamlined payment process by integrating tap payment while easing & securing transactions for users and confirmed strong collaboration skills by working closely with app developers confirming creation of robust APIs to meet needs of both front-end & back-end systems

Codes Orbit, Islamabad, Pakistan
Worked as *"Laravel Developer"* (October 2020 – February 2022)
Responsibilities/ Accomplishments:

- ✓ Competently cooperated with development of APIs for HRM system while ensuring seamless integration with mobile applications, done addition of new features to production project improving their functionality & user experience and assisted clinical trials for various sponsors participating to technical aspects of projects such as Njoy, Redhill, Anatara & Dentine
- ✓ Capably made significant contributions to Latest Beta Project while facilitating development of cross-platform apps that could be easily uploaded & managed by using Latest Beta system and actively contributed to success of projects by participating in agile software development process leveraging scrum methodology to meet deadlines & deliver high-quality features

PK Team, Islamabad, Pakistan
Worked as *"Laravel Developer"* (September 2019 – August 2020)
Responsibilities/ Accomplishments:

- ✓ Skillfully developed enterprise resource planning (ERP) systems tailored for specific industries including centralized order processing system for gemstone professionals & ERP system for wholesale food industry in Thailand and crafted & kept multi-lingual, multi-currency e-commerce websites while guaranteeing global accessibility & seamless transactions for users from different regions
- ✓ Made an online marketplace platform for car buyers & sellers in Estonia similar to UAE's Dubizzle while facilitating aggregation of thousands of new, used & certified second-hand cars and operated different versions of Laravel evaluating & optimizing performance to ensure robustness & efficiency of applications
- ✓ Created multi-lingual & multi-currency e-commerce website while expanding reach of businesses to global audience enabling smooth cross-border transactions and delivered specialized ERP system for wholesale food industry in Thailand focusing on management of perishable goods which improved efficiency & reduced waste

Key Achievements

- Top Performer 2023 Fine Hygienic Holdings, Dubai, UAE

PROFESSIONAL QUALIFICATION

University of Engineering & Technology (Mardan Campus), Peshawar, Pakistan (September 2015 – July 2019)
BS Software Engineering

Additional Certification

- Developing Back-End Apps with Node.js and Express
- NodeJs - The Complete Guide (MVC, REST APIs, GraphQL, Deno
